

FEBRUARY. II Month.

Unlike where Tyranny, the Rod maintains
O'er turfles, leafless and uncultur'd Plains,
Here Herbs of Food and Physic, Plenty showers,
Gives Fruits to blush, and colours various Flowers.
Where Sands or stony Wilds once starv'd the Year,
Laughs the green Lawn, and nods the golden Ear.
White shine the fleecy Race, which Fate shall doom,
The Feast of Life, the Treasure of the Loom.

And whereas a Method of correcting the Calendar in such Manner, as that the Equinoxes and Solstices may for the future fall nearly on the same Nominal Days, on which the same happened at the Time of the said General Council, hath been received and established, and is now generally practised by almost all other Nations of Europe: And whereas it will be of general Convenience to Merchants, and other Persons corresponding with other Nations and Countries, and tend to prevent Mistakes and Disputes in or concerning the Dates of Letters, and Accounts, if the like Correction be received and established in His Majesty's Dominions;

May it therefore please your MAJESTY, That it may be Enacted; And be it Enacted, by the King's most Excellent Majesty, by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same, That in and throughout all His Majesty's Dominions and Countie in Europe, Asia, Africa, and America, belonging or subject to the Crown of Great-Britain, the said Supputation, according to which the Year of our Lord beginneth on the Twenty-fifth Day of March, shall not be made use of from and after the last Day of December, 1751; and that the first Day of January, next following the said last Day of December, shall be reckoned, taken, deemed, and accounted, to be the first Day of the Year of our Lord 1752; and the first Day of January, which shall happen next after the said first Day of January, 1752.
